

Complete: The Fairbairn building is kitted out with the best facilities.

Fast office fit-out

24 FAIRBAIRN Avenue is a 4500sqm building located within the Fairbairn Business Park and adjacent to the Canberra International Airport.

The entry by Bassett Consulting Engineers, Point Project Management and Spotless was for the recent fit-out of the building for the Department of Defence and the Defence Science and Technology Organisation (DSTO).

The fit-out included complex video conferencing suites, an integrated audiovisual theatrette, a gym, computer laboratories and specialist DSTO technical requirements.

Due to the range of communications and security considerations, specialist planning and detailed discussions with the client were required.

The project was given the highest priority by the Department of Defence and was set a program for completion not matched by any fit-out before, let alone a high-security Federal Government department.

The project was delivered on time and within budget, with the project team completing a 40-week design and construction in 12 weeks — a great effort for any company.
